

## Claims

What is claim d is

- Sub  
a-7
1. A resilient, elastic, dimensionally dynamic mobile method of adhesive wood joinery complete in itself without fasteners, joinery millwork or supporting structures.
  2. The joinery of claim 1 wherein the joints exhibit hinge like flexibility in many different directions.
  3. The joinery of claim 1 wherein the individual wooden elements move freely and independently of each other.
  4. The joinery of claim 1 wherein the adjoining edges of the individual wooden elements contact each other.
  5. The joinery of claim 1 wherein the wooden elements joined are not displaced permanently by impact or expansion but are drawn back to their original position.
  6. The joinery of claim 1 wherein the wooden elements joined need not be precisely milled or fitted for a perfectly tight joint to be formed.
